National Agricultural Research Centre Park Road Islamabad
TEST REPORT

Name & Address of Client: Bagh Honey**Sample Name:** Sider**Total Sample:** 01**Testing Date:** 17-11-2025**Analysis Purpose:** General**Sampling done by:** Client**Reference Method:** IHC methods of Honey Analysis & Melissopalynology; Kerkvliet & Meijer, 2000.**Any Alteration /Addition Or exclusions from the Standard method:** None

S.No	LAB ID	Qualitative pollen Analysis				Qualitative Adulteration Analysis
		Pollen Density	Primary pollen	Secondary pollen	Minor pollen	Sugar Adulteration
1	PL-1	High	Sider	-	Trifolium +Wild Flower	Low

Sugar Adulteration: Very High & High= Non-satisfactory

Medium & Medium to High= Non-satisfactory

Low & Low to Medium =Satisfactory

Sensory Analysis

LAB ID	Sensory Analysis			
	Visual Assessment	Tasting Assessment	Olfactory Assessment	Consistency
PL(1)	Color Light	Okay	Okay	Liquid

Physico-chemical Parameters

LAB ID	Fiche's Test	Moisture (Not more Than 21%)	HMF (Not more than 80 mS/cm Hydroxymethylfurfural)	pH (3.0-6.40)	Electrical Conductivity (Not more than 0.8 mS/cm)
PL-1	Negative	19%	45	3.2	0.1

Remarks: The test report is for 01 sample of PATCO sider honey.

- ❖ According to microscopic analysis, all sample show sider as major pollen and Trifolium, Wild Flower, as minor pollen.
- ❖ According to sugar Adulteration all sample show low Sugar.

Prepared by:**Note:****Disclaimer:**

- ✓ Result relate/pertain only to the sample tested.
- ✓ Laboratory does not take responsibility for any error due to sampling by client.
- ✓ The value of uncertainty of measure is available with lab can be provide on request with 95% confidence level.
