

# HAV Platform

## General Information

| Field                  | Value                                     |
|------------------------|-------------------------------------------|
| Report ID              | HAV-HNY-2026-0036                         |
| Batch ID               | BATCH-HNY -2026-36                        |
| Product Name           | Honey                                     |
| Honey Type             | Blossom Honey                             |
| Botanical Origin       | Clover (based on organoleptic assessment) |
| Geographic Origin      | Brezojevica, Plav, Montenegro             |
| Producer / Beekeeper   | Apiary Brezojevica                        |
| Laboratory             | HAV Food Quality Lab                      |
| Accreditation          | ISO 17025                                 |
| Sample Collection Date | 27.7.26                                   |
| Sample Received Date   | 29.7.26                                   |
| Analysis Date          | 31.7.26                                   |
| Report Date            | 3.8.26                                    |
| Sample Code            | HNY-2026-036                              |
| Laboratory Sample No.  | LAB-HNY-2026-036                          |

## Physical & Chemical Analysis

| Parameter               | Result | Unit        |
|-------------------------|--------|-------------|
| Moisture                | 19.0   | %           |
| Colour (Pfund)          | 21.8   | mm          |
| Colour Description      | White  | —           |
| Electrical Conductivity | 0.33   | mS/cm       |
| Free Acidity            | 28.5   | meq/kg      |
| pH                      | 3.51   | —           |
| Diastase Number         | 28.2   | DN          |
| HMF                     | 6.44   | mg/kg       |
| TPC                     | 28.82  | mg GAE/100g |
| DPPH                    | 4.78   | mg AAE/100g |
| Fructose                | 37.41  | %           |
| Glucose                 | 31.81  | %           |
| Fructose + Glucose      | 69.2   | %           |
| Sucrose                 | 0.00   | %           |
| Fructose/Glucose Ratio  | 1.18   | Ratio       |

GAE=gallic acid equivalent; AAE=ascorbic acid equivalent

Botanical Analysis

| Parameter                   | Result                                                                                                                                                       |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Honey Classification        | Clover blossom honey                                                                                                                                         |
| Botanical Origin            | Clover-dominant multifloral                                                                                                                                  |
| Dominant Pollen             | <i>Trifolium</i> spp.                                                                                                                                        |
| Dominant Pollen (%)         | —                                                                                                                                                            |
| Secondary Pollens           | <i>Thymus</i> , <i>Vicia</i> , <i>Paliurus</i> , Apiaceae, <i>Robinia</i> , <i>Pyrus–Prunus</i> type                                                         |
| Honeydew Elements (HDE)     | No                                                                                                                                                           |
| Nectarless Species          | Cistaceae                                                                                                                                                    |
| Botanical Origin Confirmed  | Partially confirmed (low pollen concentration; clover inferred mainly from sensory profile)                                                                  |
| Geographic Origin Confirmed | Confirmed based on geographical and traceability data: Brezojevice, Plav (~924 m altitude)                                                                   |
| Comments                    | Very light blossom honey with low conductivity and very low mineral content; consistent with alpine meadow floral origin and early crystallization tendency. |

Sensory Analysis

| Parameter             | Result                                      |
|-----------------------|---------------------------------------------|
| Appearance            | Clear                                       |
| Colour Description    | White                                       |
| Aroma Intensity       | Low                                         |
| Aroma Description     | Delicate floral with mild herbal undertones |
| Taste                 | Very mild, soft sweetness                   |
| Persistence           | Low                                         |
| Texture / Consistency | Liquid                                      |
| Crystallization       | Early crystallization likely                |
| Organoleptic Defects  | None detected                               |

Sample Information

| Field             | Value             |
|-------------------|-------------------|
| Sample Code       | HNY-2026-036      |
| Location          | Brezojevice, Plav |
| Altitude          | 924 m             |
| Latitude          | 42.6              |
| Longitude         | 19.9              |
| Production System | Organic           |
| Colour            | White             |
